- Planned and helped organize department events and conferences

## ARTIST'S STATEMENT & TEACHING PHILOSOPHY

I am a visual artist and art educator living and practicing in South Florida. Creatively, my process is nostalgia-driven, and culture-inspired. When teaching or researching, the projects are driven by socially conscious ideas that push students to think beyond their normal settings. As a life-long learner, I search for new techniques to teach my students and to consistently encourage them to experiment with new thoughts and mediums. I believe in the power of art contests for myself and for my students. Participating in local, national, and international contests is a great way to exhibit work. There is nothing more gratifying than being proud of your own work.
